Total Price for the Ordering Period is \$

**B.2 HIGHLIGHTS**

- 1) Learning Services (classes) are priced on a firm, fixed price-per-student basis.
- 2) The business model calls for all program management, administration and operational support to be included in the firm fixed price per student price for the course. Direct charge of contractors personnel will only occur when major or complete instructional design, development or major redesign, in accordance with Section C.6, are ordered.
- 3) The specific services will be identified via individual Task Orders. Each Task Order will be issued pursuant to and within the scope of the Section C, Statement of Work.

- 4) In accordance with Clause 3.2.4-20 of Section I of the contract, INDEFINITE QUANTITY, the minimum price of services to be ordered for this contract is \$50,000.00.
- 5) As individual task orders are prepared, each order will identify the material and/or travel costs associated with that particular order. Since the actual amount of these costs will not be known by either party at the time of issuance of a time and materials order, both parties (contractor and FAA) will agree on Not-To-Exceed (NTE) costs for materials and/or travel required to support the efforts called for by the individual order.
- 6) Profit shall not be paid on material costs. Reimbursement of materials handling costs under this contract shall not exceed the following: X% of actual direct cost of material
- 7) Profit shall not be paid on Travel costs. Actual costs shall include indirect expenses if so allocated in accordance with the contractor's customary accounting practices. Reimbursement of Indirect costs for travel under this contract shall not exceed the following: X% of actual cost of transportation and per diem. Contractor is required to follow Federal Travel Regulations.
- 8) The labor rates applicable to Line Item X002 are fully burdened with Overhead, General and Administrative Costs, Profit/Fee and any appropriate Escalation charges.
